Navigation Methods

Module_2/start/TabianDating

Keeping it “Real”

Up
Next

Alert dialog

Intents

Activity animations

Dependencies

Navigating to a New Activity

Implementing an Alert Dialog

Module Review

Dependencies

RecyclerView support

Design support

CardView support

Circle ImageView widgets

Custom LikeButton widget

Glide library

Custom BottomNavigationView library

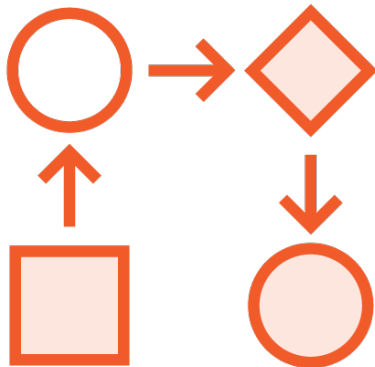

Remember!

Jitpack.io reference

LoginActivity -> MainActivity

```
@Override
public void onClick(View view) {
    Log.d(TAG, "onClick: clicked.");

    if(view.getId() == R.id.btn_Login){
        Log.d(TAG, "onClick: logging in the user.");

        Intent intent = new Intent(LoginActivity.this,
MainActivity.class);
        startActivity(intent);
        overridePendingTransition(android.R.anim.fade_in,
android.R.anim.fade_out);
        finish();
    }
}
```

A Warning!

Getting dependencies

Creating new activities

Creating layouts

Attaching widgets to id's

Shared preferences

Navigating using activities

Navigating using fragments

Building fragment classes

Fragment containers
